

ACCURATE AND FASTER BOREHOLE DIAGNOSTICS

The new solution presented by O-Pitblast provides a quick way to take accurate readings of quarry boreholes. The O-Pitdev incorporates a number of innovations, including wireless communication with the smartphone, thus bringing agility, lower cost and much more efficiency to your operations.

- Quick release rope system.
- Bluetooth 4.2 makes it easy to transfer information between the smartphone and the probe.
- Led status indicator for easy and fast operation
- Direct connection to the O-Pitdev App transmits data over the internet to the cloud, giving immediate access to the mining engineer responsible for project supervision.
- Structure made of AISI 304 stainless steel.
- 100% waterproof.
- Ergonomic nose that makes easy to operate even on the most inaccessible boreholes.
- Withstands extreme temperatures from **-25° to 70°C**
- **+90%** of the materials used are recyclable.

■ The O-Pitdev comes equipped with Bluetooth 4.2 connectivity that enables the communication with any smartphone equipped with Bluetooth with Android 5.0 or above. A company app is required to operate the O-Pitdev probe. The application can be downloaded on the Google Play Store.

■ When you buy O-Pitdev you are provided with insurance that can be renewed every year.

O-Pitdev includes:

- Probe
- Hardcase
- Battery charger
- Rope
- Armband
- O-Rings
- Carabiners
- User Manual
- Grease
- 3 Touch pens
